

DRAWING WAVES

Grade: High School

Students will create drawings using cups or saucers. The students connect lines of semicircular shapes to create wave forms which are then colored in.

WHAT YOU NEED:

Pencils

Paper

Coffee cup or saucer

Color pencils or crayons or pastels or markers

Teacher Asks:

Students should trace the top edge of the cup or saucer at the top left of the page.

Students then trace the bottom connecting the previous line.

Students repeat the pattern across the page.

Students beginning at the left side, approximately 1 inch below repeat the first tracing.

The pattern will repeat until the page is full.

Students then color each wave without repeating colors.
