

Spelling Bee

NUMBER OF PLAYERS: 6 - plus the Moderator

OBJECT: Players stand in a line. A word is chosen at random, preferably easy enough for everyone to spell. The player on the right starts with the first letter, the second player continues with the second letter, the third says the third and so on until the word is spelled correctly.

IF a player gives the wrong letter, that player sits down. The first player starts the same word again. Play continues until there is only one player left that correctly spells the word.
