

Flashy Fish Art - Grades 2-5

Supplies: 2 pieces of Computer Paper, Printer to print Fish Page, colored pencils, markers or crayons, scissors and a glue stick.

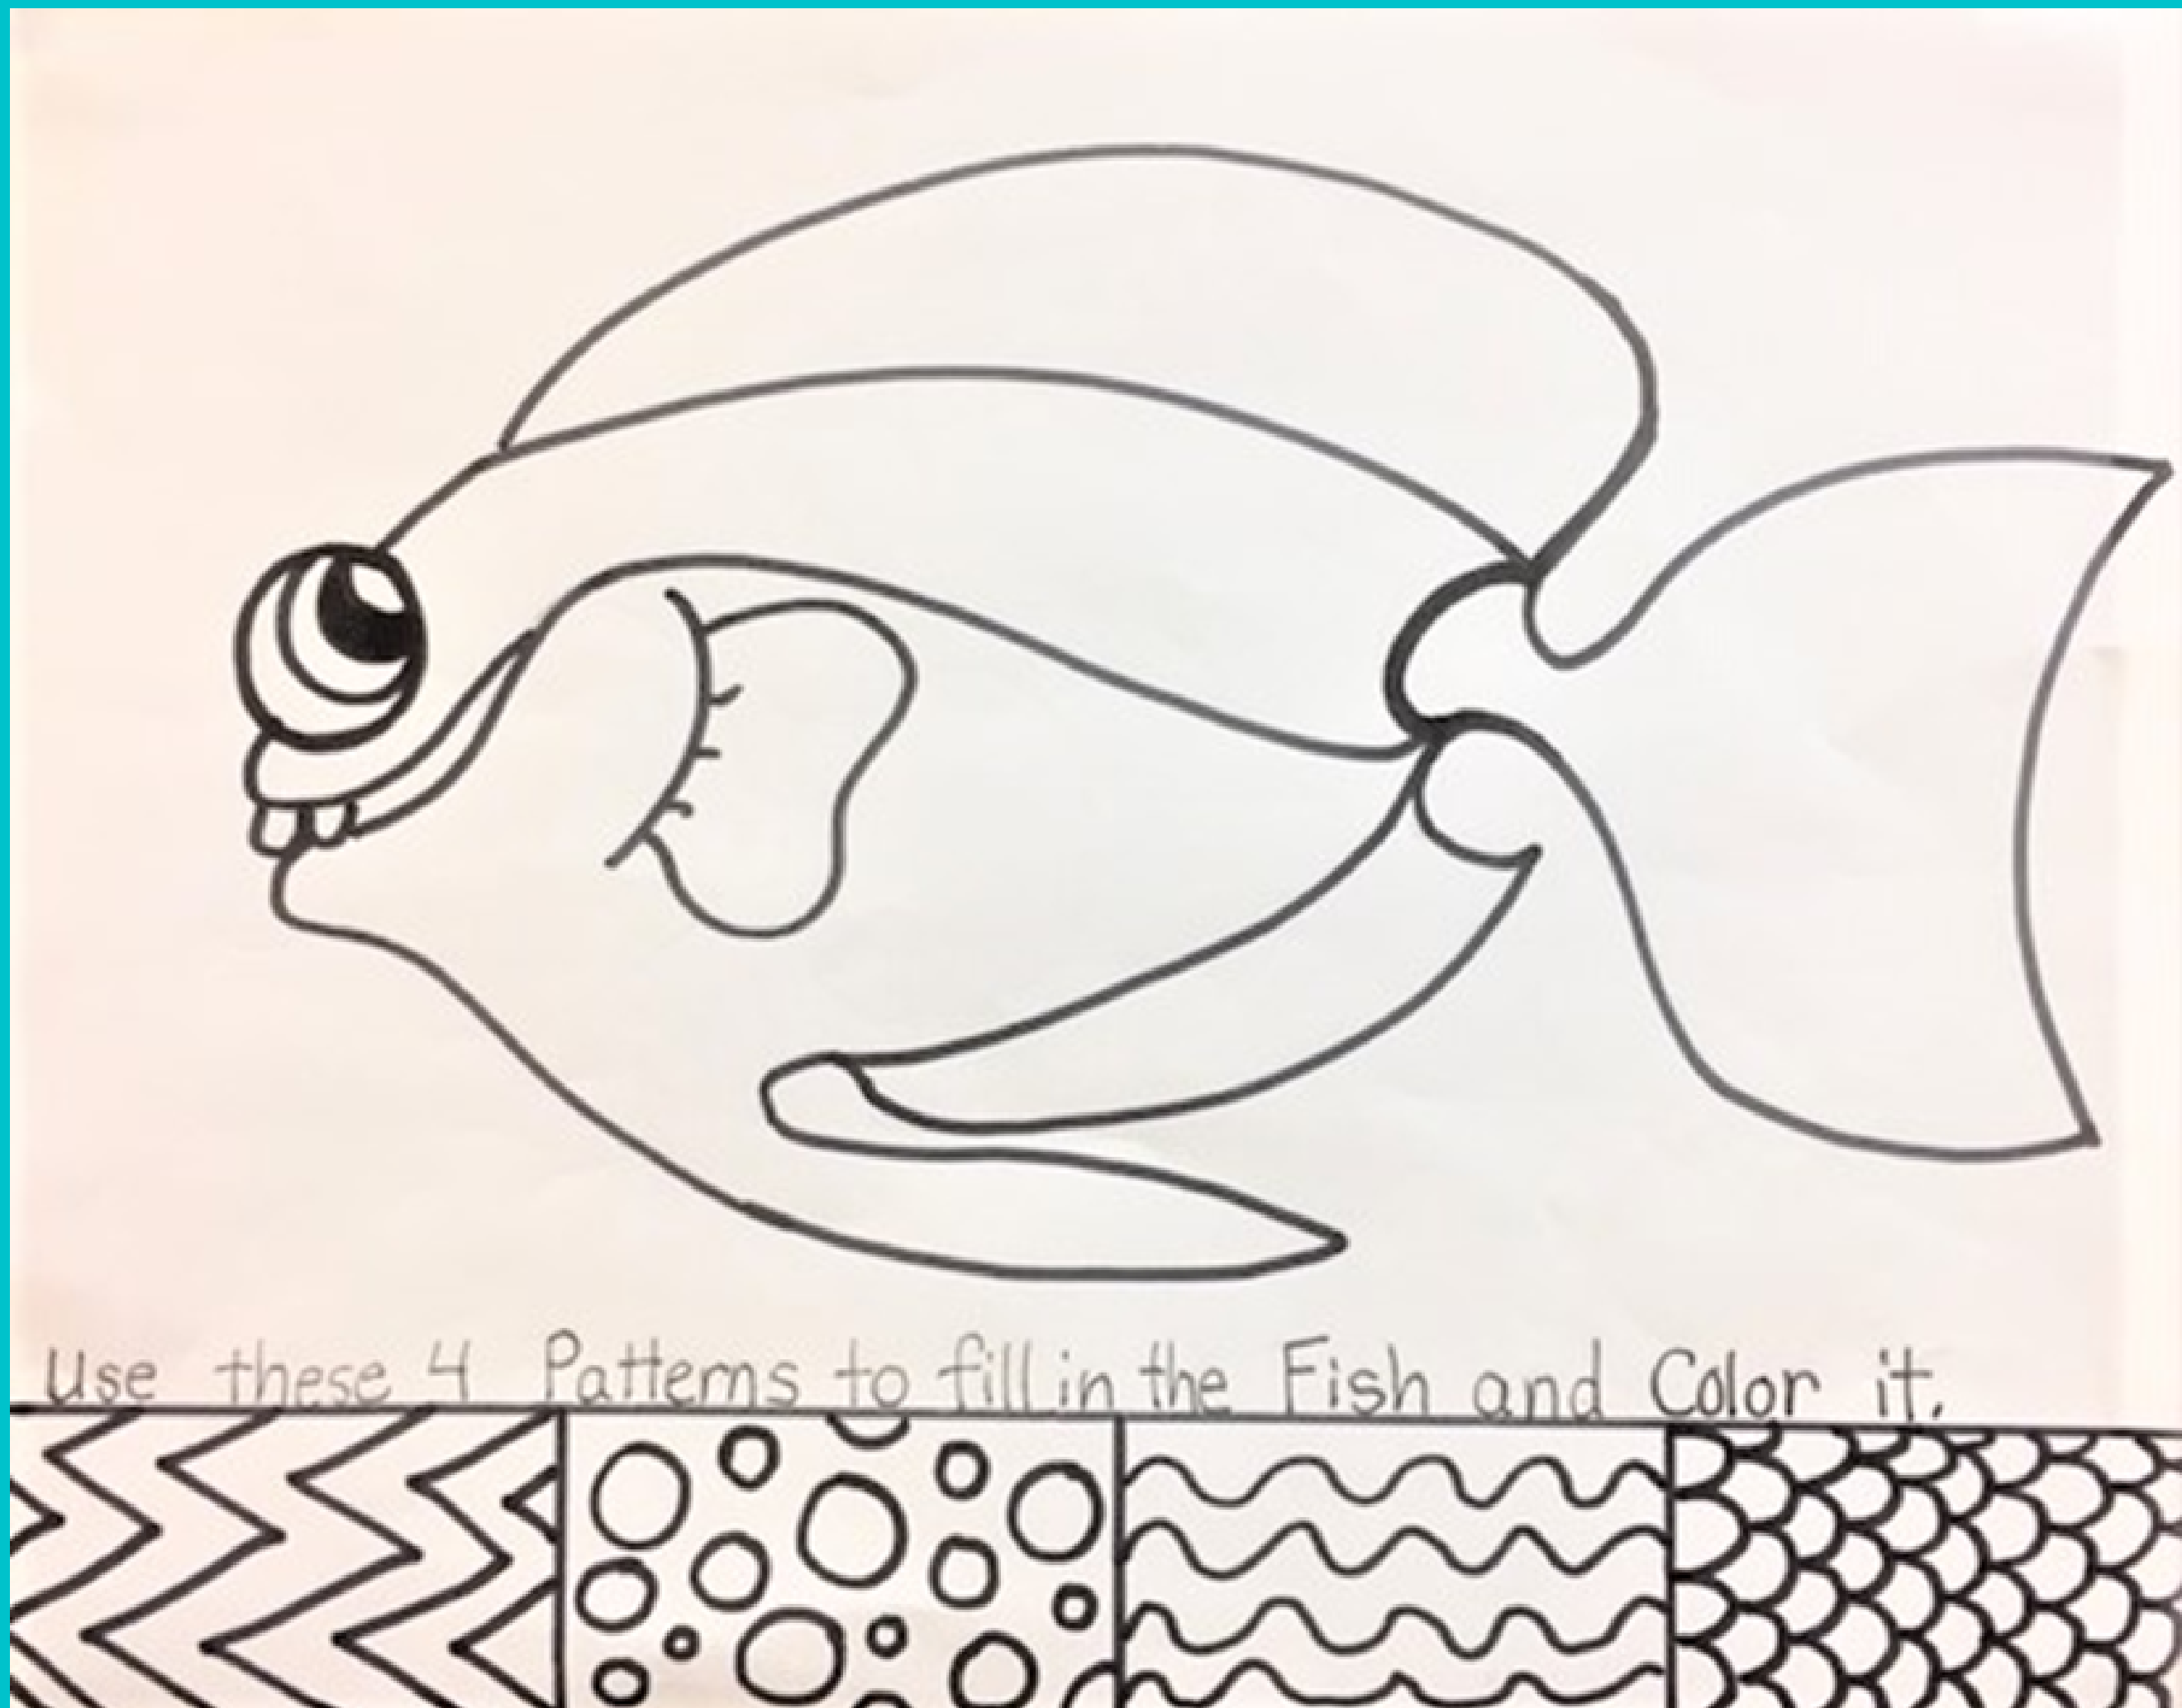

1- Print the page with the Fish on it (page 2).

2- Notice the patterns at the bottom of the page. Also, notice the fish is divided up into sections. Fill in the sections with these patterns in one color.

Here is an example of the finished flashy fish (I used a black sharpie):

- 3- Color the sections different bright colors to make your Fish very Flashy!!
- 4- Cut out your fish and glue it to the water background paper.
- 5- On a second piece of paper draw a watery background with blue, green, and turquoise and color it in all around your fish.
- 6- Now you have a Flashy Fish to share with others!
