

Musical Spoon Activity

Grades 2-4

Hurray for spoons! Try this musical spoon activity for kids, and show them how easy silverware is to play.

HOW IT WORKS:

Run a spoon up and down the ridges of a metal can. You'll get a nice sound. Try sliding it across all the textures of a metal kitchen grater. (Be careful not to slide your fingers on the grater!)

Think of other kitchen objects that you could use with a spoon to make music. Create your own song using all these instruments, and write your own lyrics. Then perform your musical melody for your family and friends. You can also put on songs and play along to them.

WHAT YOU'LL NEED:

Old spoon

Ridged metal can

Metal kitchen grater

Music player or access to iTunes, YouTube, Spotify, etc. (optional)
