

# Musical Scrapbook - Grades 4-12

How it works: This activity can involve everyone. Your student (and other family members) can look through old family photos of anything having to do with music: a concert you went to, pictures of the student or family playing an instrument or singing, ticket stubs or programs from concerts, etc. Collect the pictures or souvenirs in a scrapbook or in a photo slideshow on your computer or other device. If you want, you can make a slideshow (in iPhoto, for example) and add music. Share it with family and friends.

What You'll need: Pictures of music-related events from your student's life, ticket stubs or concert programs, posters, etc., a camera, a device to make a digital slideshow (iPad, smartphone, computer), or a real scrapbook or photo album to add pictures to.
